Like the town of [Paradise, CA](#), most of the town of [Greenville, CA](#) was allowed to burn to the ground because of this.

—
"A Cal Fire report filed after the incursion said the air attack pilot — who functions as a sort of air-traffic controller for other firefighting pilots — had been able to follow the drone a short distance up the river from the spot where the Dixie Fire was slowly growing beyond control.

'Eventually visual contact with the drone was lost when it descended into the Rock Creek drainage,' the report said. Rock Creek, about 2 miles upstream from the fire's starting point, is the site of a PG&E powerhouse."
